

## ***Transport of pharmaceuticals and health care products? We take care of it for you down to the last detail!***

GLS is pleased to present *HealthcareService*, a service of excellence dedicated to the transport of **pharmaceutical and health care products that do not require controlled temperatures and are not subject to ADR regulations**. For more than 5 years we have been implementing a self-control system following the **HACCP method**, which allows us to offer the highest quality and attention to detail, especially with regard to our *Food* and *Healthcare* services.

In particular, **for the health care sector**, GLS serves all companies dealing with self-medication medicines, food supplements, nutritional products such as dietetic foods, infant formula, meal replacements and enteral nutrition products, personal care, hygiene and dermocosmetic products, dressing products, diagnostic tests and other parapharmaceutical

products, veterinary medical devices, herbal medicine/homeopathy.

**We guarantee timely traceability of the parcel, at all times, up to delivery to the final recipient.** Products not delivered on the day of arrival are stored in dedicated areas to prevent deterioration of the packaging and possible contamination.

**The main advantages we offer you:**

- Adequate control and audit system
- Only selected and qualified suppliers
- Timely parcel traceability
- Maximum and constant attention to hygiene
- Staff training and education
- Respect for behavioural standards

*HealthcareService* is applicable to National Express shipments.
