These General Terms and Conditions define the obligations undertaken by GLS Romania and all those conditions the performance of which is required from the Client (consignor) in order that GLS Romania may perform the forwarding of parcels at the appropriate standard of quality.

These Terms and Conditions apply to the activities of GLS General Logistics Systems Romania in the field of postal services, primarily for the performance of postal service activities domestic and international consignments, for consignments pick-up, for the loading, unloading, handling, transshipment operations and temporary storage due to the impossibility of their delivery.

Definition of terms

Definition of terms used in these General Business Conditions:

Recipient – the person to whom the shipment is addressed;

Sender – contractual partner of GLS, legal or natural person respectively, who initiates and introduces the consignment into the postal services network;

GLS – General Logistics Systems Romania SRL, GLS Romania;

IOD – electronic or verbal information on parcel delivery (Information-On-Delivery);

POD – the proof of delivery for the consignment / the extract of the signed transport document, in copy (Proof-Of-Delivery);

Terms for consignment acceptance

The sender must properly protect the goods of the consignment in order to protect them from damage, destruction and in order not to cause damage to persons, the environment, facilities used or other consignments throughout the period of service. Appropriate packaging used by the sender, in every case, is considered to protect the postal item from pressure, shock, leakage, etc., from dispatch / pick-up by the supplier's staff until delivery to the recipient, under normal conditions of collection, sorting, transport and delivery.

GLS Romania accepts consignments presented by the sender, properly packaged, with an opaque external packaging that does not allow the contents to be viewed and which have the full identification data of the recipient filled in (name and surname / company name – for legal persons, including the street, number, block and block number, floor and apartment number, except for consignments with *CashService* – where the identification data of the sender must be included).

The sender is responsible for the parcel packaging, as well as for the data registration of the parcel label, in accordance with the contractual arrangements concluded with the supplier.

Consignments containing fragile goods must be properly packaged by the sender, using padding, anti-shock polystyrene, lining and filling materials aimed at protecting the goods or any another material that mitigates the mechanical shock, and must have the "Fragile" label attached; a "Fragile" inscription only serves as a warning, it does not protect the

goods lacking properly packaging materials. GLS Romania undertakes to recognize and comply with the inscriptions / labels attached to the consignment by the sender, and to pay special attention to the handling and storage of the concerned consignments.

The following conditions must be met during packaging:

- Only fully sealed parcels may be dispatched (dispatched closed);
- Parcels with long, sharp protrusions are not suitable for parcel shipment.
- Boxes must be utilised optimally, assuring the appropriate size and quality of the packaging material, and filling out the entire package, should protect the goods from damage.
- Electronic devices and other products recalled for repair should be dispatched in their original, complete packaging, with appropriate padding.
- Bottles and flasks placed in parcels should be protected by protective layers placed between them as well as at the bottom and at the top of each item, with protection materials and padding.
- Irregularly-shaped goods that are difficult to package must also be protected within the shrink-wrapping itself, using another type of packaging.

Cardboard boxes should be sealed on all sides with adhesive tape that has the Sender's company logo on it, if at all possible. Boxes strapped together in a bundle are unacceptable, as the bundles may fall apart and thus only the parcel unit identified with a label will arrive at the destination point; each box must be individually labeled and packaged separately from any other consignment.

- The bag containing the address, the label, the parcel ticket and the delivery note, as well as the stickers used for identifying additional features, must be attached by the sender to the largest side of the parcel next to the GLS bar code label.
- If several parcels are dispatched to the same address, the stickers indicating the use of any additional features must be affixed by the senders to each of the parcels.
- For legal persons, if *CashService* is ordered, the full amount to be collected must be indicated on the *CashService* list or, by sending the data electronically, as well as on the consignment itself, using a standard GLS sticker (if more than one parcel is dispatched from the same sender, at the same time, being delivered to the same address, the *CashService* sticker must be attached to each parcel, indicating the amount to be collected for each parcel).

- In the case of incorrect or incomplete information, **GLS** will attempt by any means to clarify the situation.
- For private senders (natural persons): the amount to be collected must be indicated on the external packaging or on the attached label.
- Goods with hazardous content, even with external indications, are not accepted under any circumstances.

Since GLS Romania considers it essential to protect shipments from damage, packaging advice may be requested by GLS Romania customers free of charge, through the Customer Service Office.

The return period is a maximum of 2 working days for domestic parcels and up to 8 working days for international parcels, calculated from the expiration date of the above notice (retention period) or the delivery attempt, as the case may be, and the return will be

made to the sender's address, operations that will not involve any other payments (it's free of charges).

GLS does not perform a second delivery attempt if that parcel is subject to *ExpressParcel* or special delivery (for which the sender has requested the delivery at the scheduled date and time to a specific address).

GLS undertakes liability for late parcel delivery in the event of exceeding delivery and return times, by paying penalties of 0.1% per day of delay from the service fee for all parcels other than the *ExpressParcel* service.

The sender may request the issuance of the proof of parcel submission or parcel delivery to the consignee subject to registered consignment service within 9 months from the date of submission in the GLS network. The supplier has the obligation to send the proof to the sender within maximum 30 working days of the request, via the agreed method (eg. e-mail), without incurring additional costs to the sender.

The period within which the proof of the submission of the postal item subject to a posting service of a declared value may be requested is 9 months from the date of its submission; GLS undertakes the liability to communicate the respective proof within maximum 30

working days from the request date, by a method agreed with the sender (e.g. e-mail), without incurring additional costs to the sender.

The delivery of parcels for which the *Pick&ShipService* was requested and handed over to GLS by the time agreed upon in the contracts concluded with legal entities will be made the next working day ("24-hour" does not refer to the precise transit time, but only means the next working day).

The release of the parcels takes place against the signature of the addressee or of another person who, depending on the circumstances, could be considered or assumed to be entitled to receive the parcels.

The release will be confirmed by the consignee by his signature on the consignment note ("Rollkarte POD").

The driver may request the receiver to also indicate his/her name, in addition to providing a signature, which will then be recorded among the data stored in the portable manual scanner. On this basis the recipient's name will be retrievable from among the parcel information provided by telephone or electronically.

Where applicable, the release will take place after the Cash-On-Delivery (COD) payment has been settled for parcels associated with *CashService*, and the consignment note has been signed. The consignee cannot check the contents of the parcels before delivery that is before receiving the parcel and, in case of *CashService*, before paying the Cash-On-Delivery (COD).

The sender may, in the absence of the consignee, authorise GLS Romania to deliver the parcel to an empowered person (to an authorised neighbor or another appropriate person). In the case of such authorisations, the certificate of receipt (IOD, POD) will be prepared in a modified format.

In case of delivery against receipt, the deadline for returning the written domestic or international parcel receipt to the sender is 2-8 working days and will be sent to the sender, scanned via e-mail. In the event of loss of parcel delivery receipt by the recipient, GLS Romania shall draw up and make available a duplicate thereof to the sender.

Information on parcel delivery

The Client or its representative may request parcel information at the Customer Service Office based on the parcel number, and may request the parcel information specified later on (Information-On-Delivery, IOD), as well as a delivery certificate (Proof-Of-Delivery, POD). The parcel information (IOD) service, in the case of parcels dispatched within the last 3 months, is provided within 4 hours. After this period, the parcel information is kept available for one additional year, but the deadline for providing the information lengthens to 3 working days. The POD is available in two working days following delivery.

Information on delivery (IOD) will be provided by GLS Romania to the sender regarding the parcels dispatched by it, from the morning of the second working day following pick-up, either by phone or through the web-based Track&Trace system.

The sender may request a written proof of delivery (POD) free of charge for up to 5% of the average daily number of parcels consigned, according to the contractual agreement concluded with the users; GLS Romania is entitled to charge a reasonable document-completion fee of 10 RON, if this is justified by the excessive demands for delivery-related certificates. The acknowledged consignment note countersigned by the consignee or the authorised person, including the acknowledged and signed receipt in case of delivery receipt service, is only issued/provided electronically and shall qualify as appropriate proof of delivery.

The sender is responsible for providing information on all parcels, in accordance with Article XXII of Law No. 239/2025, to provide all data necessary for the identification and collection of the RON 25 fee for parcels with a country of origin outside Europe, a declared value of less than EUR 150, and declared through simplified customs formalities H7 or IOSS.

The data will be provided for all parcels circulating through the GLS General Logistics Systems Romania SRL network.

As GLS is responsible for collecting and paying the tax, in the event of non-compliance, defective, late or incomplete fulfillment of the Sender's obligation to declare the above information, GLS reserves the following rights:

1. to suspend the provision of services.
2. to withhold the logistics tax in the amount provided by law for all parcels concerned.
3. to automatically deduct the amounts due to the refunds collected, if applicable, or by any other legal means of debt recovery.
